#011 building our Image Part 2

Introduction

this is part 11(ctd of part #10:1) from the journey it's a long journey(360 day) so go please check previous parts , and if you need to walk in the journey with me please make sure to follow because I may post more than once in 1 Day but surely I will post daily at least one 😊.

And I will cover lot of tools as we move on.

---

run

now time to action , we have an image ready to run , without any problems!

```
docker run app_009_1:1.0
```

```
(base) (master)in ~/Documents/DevOpsJourney/app_009
> docker run app_009_1:1.0
Hello Dev.to Folks! this is Omar
(base) (master)in ~/Documents/DevOpsJourney/app_009
>
```

and that's it! we have a small and simple application.

remove the tag

now we need to remove the 1.0 tag

```
docker image rm app_009_1:1.0
```

this will untagg the image with 1.0 tag

```
postgres             11.5-alpine            da01ecfbabe1
python               3.7.4-alpine           f309434dea3a
(base) (master)in ~/Documents/DevOpsJourney/app_009
> docker image rm app_009_1:1.0
Untagged: app_009_1:1.0
(base) (master)in ~/Documents/DevOpsJourney/app_009
```

```
docker image ls
```

```
(base) (master)in ~/Documents/DevOpsJourney/app_009
> docker image ls
REPOSITORY           TAG              IMAGE ID         CREATED          SIZE
